

Type 1 Diabetes and Depression: A Study for Teens and Their Families

Type 1 Diabetes Intervention Study

change the outcome®

CCHMC IRB # 2009-1228

What

This is a family-based study to see how group meetings with an expert help families to improve their communication, and teenagers to cope better with their emotions and stick to their diabetes treatment.

Who

Families (may be one parent, both parents or a legal caregiver) with a teenager 13 to 17 years old who:

- Has been diagnosed with Type 1 Diabetes for at least one year
- Has symptoms of depression (will be confirmed through a questionnaire)

Pay

Families will be compensated up to \$220 for study participation.
