

## Enrollment open for a study of an investigational insulin for children and adolescents with type 1 diabetes

We are currently seeking children and adolescents with type 1 diabetes to participate in a multinational clinical trial. Participants must be on multiple daily injections using an insulin pen or syringe. This study will compare an investigational ultra-rapid insulin to current treatment in controlling blood sugars.

Study participants should meet the following criteria at study start:

- Are at least 1 to < 18 years of age
- Diagnosed with type 1 diabetes for at least 6 months and do not currently use an insulin pump
- Treated with long-acting insulin once or twice daily and rapid-acting insulin at mealtimes for at least 90 days
- Have an A<sub>1c</sub> between 6.5% and 9.5%

If you and your child are interested in participating, study site locations and contact information along with further details may be found at the following website:
